

Carbon Reduction Plan template

Supplier name

BCS Electrical & Building Services Ltd.

Publication date

16. 09. 2025

Commitment to achieving net zero

BCS Limited is committed to achieving net zero emissions by 2039.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2023

Additional details relating to the baseline emissions calculations:

February 1st 2023 – January 31st 2024

Baseline year emissions:

| Emissions | Total (tCO ₂ e) |
|--|----------------------------|
| Scope 1 | 20.1 |
| Scope 2 (location based) | 2.0 |
| Scope 3 (upstream transportation and distribution, waste generated in operations and employee commuting including working from home) | 110.5 |
| Total emissions | 132.6 |

Current emissions reporting

Reporting year: 2024

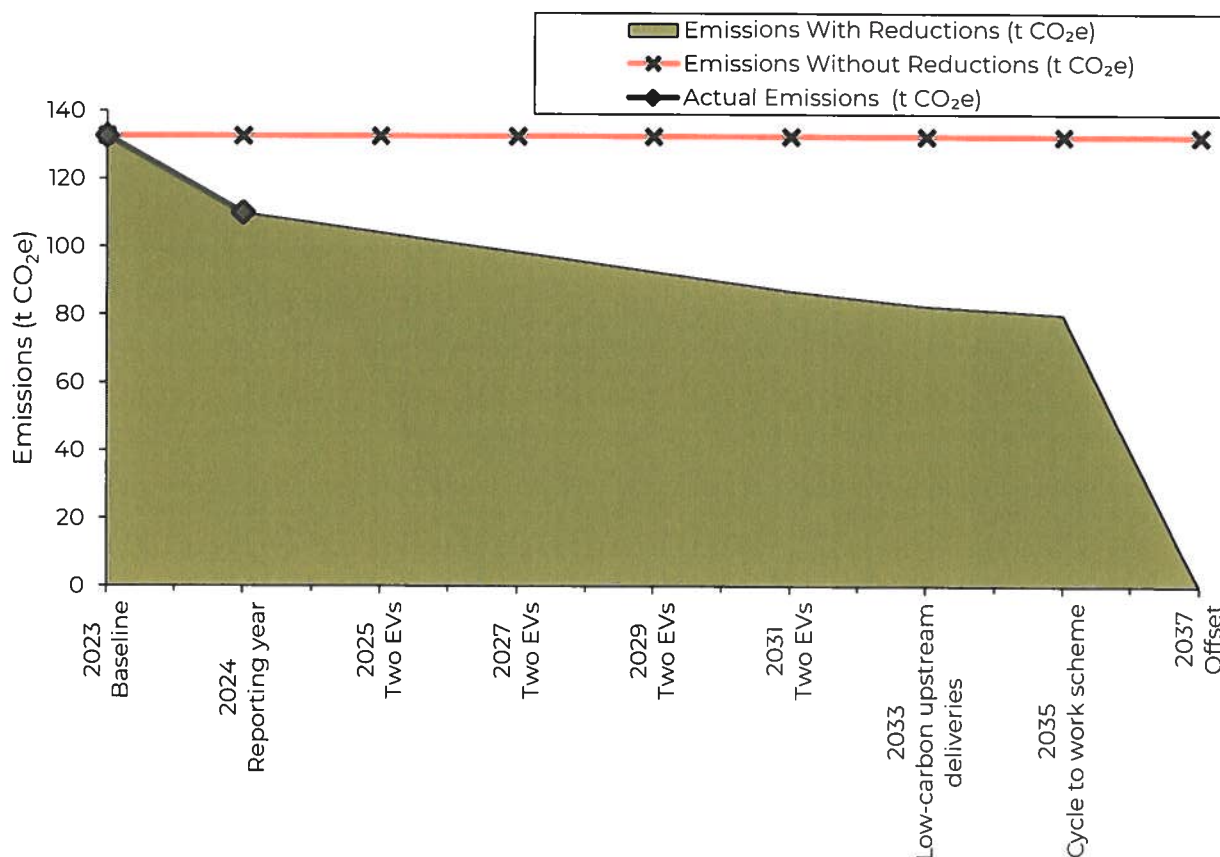

| Emissions | TOTAL (tCO ₂ e) |
|--|----------------------------|
| Scope 1 | 23.0 |
| Scope 2 (location based) | 3.4 |
| Scope 2 (market based) | 0 |
| Scope 3 (upstream transportation and distribution, waste generated in operations and employee commuting including working from home) | 87.0 |
| Total emissions | 113.3 |

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

- Sourcing electricity generated using renewable sources (already implemented).

We project that carbon emissions will decrease over the next ten years to 80.1 tCO₂e by 2035. This is a reduction of 27% from 2024.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to 2.0 tCO₂e, a 1.5% reduction against the 2023 baseline and the measures will be in effect when performing the contract.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Purchasing electric vehicles (EVs)
- Using low carbon delivery services (for upstream transportation and distribution)
- Promoting and implementing low carbon commuting schemes (e.g., cycling to work).

Declaration and sign off

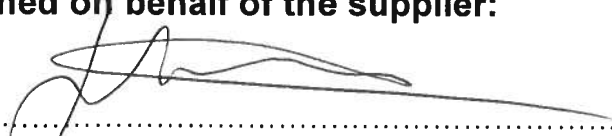

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:
